### 2. Corrections to Known Issues

This information is derived from External Trouble Reports (ETRs) and Engineering Change Requests (ECRs).

#### 2.1 Electronic Data Exchange

Mail.XML postage statement processing has been updated to improve performance when processing co-palletized tray-based mailing jobs. Previous performance issues sometimes caused co-palletized tray-based Mail.XML jobs to fail import into Seamless Acceptance and Service Performance (SASP), leading to excessive "unlinked tray" errors on the Mailer Scorecard.
